

# Gestion de Menu

On vous demande de développer une plateforme pour pouvoir stocker des menus  
cette plateforme devra comprendre deux options aux moins :  
l'ajout de menu dans la base de données  
la consultation de ces derniers.  
L'application sera développée à l'aide de php, MySQL, et HTML.

Page d'accueil:

Option liste de menus :

## présentation de menu

Antilles cuisine centrale				
Soyons ce que nous mangeons donc mangeons local !!!				
idmenu	jour	entrée	plat	dessert
1	lundi	salade niçoise	riz djon-djon et aile de dinde	coulant au chocolat
2	mardi	carottes rapées	riz blanc et poulet frit	salade de fruit
23	mercredi	lettuce	rice	chocolate cake
21	jeudi	entrée22	plat33	dessert44

Option ajouter un Menu :

## Saisie de menu

idmenu

Jour du menu

Entrée

Plat

Dessert

Réinitialiser

Envoyer

Voici le code de chaque pages respectivement :

Page d'accueil :

```

<!Doctype html>
